### **DETAILED ACTION**

1. This application has been examined. An informational disclosure statement (IDS) filed October 28, 2003, has been considered. Claims 1-17 are pending.

#### ***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1, 4, 5, 7-12 and 17 are rejected under 35 U.S.C. 102(b) as being anticipated by Weil. Frame recitation is readable on the “frame” which supports the “restricting “ ports which define the filter element 38. Note the check valve 29 (claim 4) which is responsive to the movement of the float 28. The filter element 38 is disposed between the inlet 17 and the outlet 18 (claim 10). An orifice plate 30 I shown and is disposed between the check valve and the outlet (claim 11). The weight of the float is a biasing means (claim 12). A removable “cleanout” plug 88 is shown (claims 8 and 17).

#### ***Allowable Subject Matter***

4. Claim 2, 3, 6, 13-16 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
